

Don Lea Barn Door Track System

Benefits

- ❖ Track hangers are independent from the track, which allows anchoring directly on stud or weight bearing support
- ❖ Track hanger holes are slotted to allow adjustment up to 1/8" to achieve proper levelling
- ❖ Spacers are included to enable adjustment of hangers out from the wall in 1/8" increments, up to 7/8" (standard hanger is 3/4")
- ❖ Door stop can be placed anywhere along the track
- ❖ Aluminum parts are anodized
- ❖ Weight limit up to 125lbs per track hanger when lag screws are fastened to studs or equivalent support structure (maximum of 24" between track hangers recommended; all 4 hangers should be used for each 80" length track system)
- ❖ Cam in the wheel system allows height to be adjusted from 0" to 1/4" up or down once door is hung
- ❖ Standard 80" aluminum track can easily be cut to size, then capped off with included end caps
